Bringing joy to the garden

Over 400 high-quality wooden
products by Palmako

Dear Customer,

Like all of us also we cannot overlook this extraordinary year we have behind. Now it is time to take a deep breath and rest a bit. And what is a better place for that than your own garden? We aim to help create this space for you by bringing joy to your garden – the place to rest, to deeply relax, to spend time with your loved ones and to collect special moments. Here you will connect with your true inner essence, restore your strength and composure in order to face new challenges.

Our goal is to make the creation of your own personal garden as easy and enjoyable as possible. For this we have many different solutions and products in our catalogue for 2021, which help you to build up the future garden paradise of yours, using wood as a natural, warm, friendly and renewable material. Our products are made of the finest Nordic fir tree, which is known worldwide for its excellent properties. Purchasing wooden products is a real act to support environmental-friendly attitude and do at least a little bit good to our planet.

You can sense a lot of cooperation between every department of the company behind the following pages of this catalogue. Our garden product range is diverse and pleases everyone, who seek to make their garden a place to be. For your convenience we have organized our products by categories on the side of the catalogue so you can easily find what you are looking for.

Just close your eyes and imagine your dream garden. When you pass by a carport next to your house, maybe you will see a terrace with terrace fences and a cosy corner with a garden table and benches surrounded by fence panels so you will have privacy while spending time with your family or friends.

Maybe there is a shed in the back corner of your garden where you can store your bicycles, firewood, grill accessories or lawn mower. On the other side of your garden there could be a garden house or pavilion for escaping from everyday life. You can have summer parties there or just be alone with yourself in a moment, at the same time watching your kids play in the playhouse, sandbox or playground. You can see flowerboxes here and there, making your garden as beautiful or romantic, as you want it to be. It is just a start: your imagination can go beyond your dreams. Now open your eyes again. When you explore our catalogue's wooden garden product range you will see that we have all these products available.

To enjoy our products in the garden you will need to protect the wooden product against weather effects, wood-destroying fungi and insects. Therefore, we truly recommend using our product treatment service. Depending on the product type we are able to dip, pressure-treat or paint our products (initially white or grey painted). Please read more about treatment possibilities on pages 272-273.

We continually appreciate your feedback regarding our products and services and we are eager to know how you have used them. You are welcome to share your ideas, proposals and photos via social media with [#palmako](#) [#bringingjoytothegarden](#) or share them privately with us by sending an e-mail to palmako@palmako.ee or via our homepage www.palmako.ee.

We wish all our customers a safe and sustainable 2021!

Marketing Manager

The joy of being in the garden

The garden – our connection with nature.

We live our lives at crazy speeds amid droves of people and every day we become increasingly more alienated from nature. Going outdoors takes time and money and is an all around taxing experience. However, our ancient selves don't want to stop smelling the grass in the morning or seeing the light of the setting sun through tree branches. When we go back to the past along this line of heritage, we quickly reach our predecessors, who were peasants,

cattle breeders or hunters. Urbanisation is a new phenomenon in human history. A garden is often our last direct point of contact with nature, a reminder of the unity our predecessors felt with the surrounding environment. This feeling is deeply rooted in our subconscious and it makes the existence of a garden and time spent there so important for us.

The joy of being in the garden.

We all strive to achieve ever-greater quality of life. Constantly juggling mountains of work and the need to spend time with our family forces us to look for balance between home and office, between reaping and sowing. It motivates us to emphasise our presence.

Our restless spirit and modern life force us out of our comfort zone – searching for greater value in life through social interaction and self-realisation.

Palmako doesn't build an artificial world with fake emotion and fake people. In the shape of the garden, Palmako extends quality living space, making it a special place in people's lives. Somewhere they live their real lives. A life which has meaning. Which is filled with quality time spent together, which we share with those closest to us. Somewhere we experience special moments.

We don't just make garden houses. We don't restrict ourselves to comprehensive garden solutions either.

We bring joy to the garden.

A garden is often our last direct point of contact with nature, a reminder of the unity our predecessors felt with the surrounding environment.

The many dimensions to garden life.

The special moments in our lives are different and the roles gardens play in our lives are also different. A garden can be a place of relaxation where you hide from the world. Or it can be a meeting place where you discuss life with your loved ones. A garden can be the place where you devote yourself to your hobbies.

Every material has its character and soul. Wood is warm and beautiful and we understand its life cycle.

A beautiful garden can be our best feature for impressing neighbours and passers-by. It can also be a practical place for growing organic fruit and vegetables for our own use. We believe that quality time has many angles and colours, like an eventful life. We do not make decisions for garden owners; we simply do our best to turn their gardens into special places where moments are inspiring and different, just like people. The more varied our garden is the more joy it brings us.

Timeless garden wood.

We have used wood to build our houses and gardens since ancient times and it has accompanied us throughout the centuries of our development. Every piece of wood has its own character and soul. Wood is warm and beautiful and we understand its life cycle. Like us, trees move in a circle of life, growing and living in the

time given to them. The constantly repeating cycle makes wood a renewable resource and using resources responsibly is increasingly more important in the context of growing environmental problems. Wood produced through correct and fair management is undoubtedly one of the best choices of our time. Wood is timeless – ancient and familiar on the one hand, and a building material with a clear future on the other.

New this year

Your garden reflects your passion and your dreams, but also your practical mind. To help your imagination fly, we have collected everything you need to enrich your garden into this catalogue. In addition, we have added more choices to our product range so you can pick the best solutions for your garden and feel joy surrounded by the creation you have made.

To find new products quickly, just follow the sign "NEW!" in brown squares next to the product and yellow circles in the index and check the product overview pages before every product category. Here are the innovations of 2021 in a nutshell:

Under the Kids category you can find **Jonas** and **Jacob** – new brown pressure-treated playgrounds – as well as an elegant playhouse **Marie 5,4 m²** with loft, where your children can play hide-and-seek or make plans for the next adventures.

Flat roof cabins category has now an addition of modern looking **Caroline 14,5 m²**, which can be dip treated and is perfect for either accommodating guests, having summer parties or just for relaxing from the busy everyday life. Attached movable window louvre panels help to gain some privacy or offer shade from the scorching sun.

Looking at the category of Nordic houses (ready-made wall elements with wind protection plastic inside), you can now see **Annabel 13,4 m²** with sliding doors and **Simone 13,6 m²**, which are perfect for a home office or comfortable guest house.

New grey pressure-treated glasshouse of two different sizes have been added to our product range of Pavilions: **Emilia 5,4 m²** and **Emilia 8,2 m²**. Both of them have a wooden sockel which makes your glasshouse unique and personal.

Garages section has now widened by a Nordic option of a narrow garage: **Sten 22,9 m²**. It fits perfectly even to the small garden and you can compactly store your stuff in a little extra storage behind the inner wall. One can enter the building from both ends.

In order to store your garden tools, lawn mowers and other necessary items, we have added three new sheds, which ready-made wall element construction makes the assembly fast and easy. **Nils 5,4 m²**, **Nils 8,2 m²** and **Marcus 6,5 m²**, it's up to you which one do you prefer.

Under the Fence category you can see that some fence panels have now new treatment options: **dark grey (RAL7016) paint for Reena, Helis, Doris and Elly** in the sizes of 1–4, also **green pressure treatment (GNVPI)** for the whole **Helis family** and **posts for fence panels**. Last year Lovisa 10 with 19 mm palisade profile was added to our Fence category. This year we offer white painted **Lovisa 10 gate** as an addition.

To meet the market demand for maintenance free products and make our customers' life more convenient, Palmako is now able to coat **several houses with one layer of white primer (WTPNT1+0)**, which simplifies the further finishing of the product. We offer this treatment for the following products: playhouses Tom 3,8 m², Otto 3,6 m² and Felix 1,9 m², Paula pergolas, pavilions Betty, Lucy (as well as Lucy elements) and Nova, carports Robert and Karl (also Karl sheds).

We truly hope you now have a better overview of all our news and innovations and we have given you inspiration to start renewing your outdoor area.

Palmako is a part of the Lemeks Group

Lemeks AS was founded in 1993 with an aim of creating a modern forest stocking company systematically covering the whole country and on the basis of which a timber industry could be established that values local timber.

Today the Lemeks Group has developed into the biggest forestry company in Estonia that is funded by Estonian capital and operates successfully in the sphere of timber processing and forest stocking as well as in agriculture. 34 subsidiaries and related companies provide employment to more than 1000 people in Estonia, Latvia, Germany, Sweden, Norway, France, Spain and the United Kingdom.

Belonging to the Lemeks Group provides Palmako support in financial, IT and personnel management. It also gives an excellent opportunity to share valuable information and experience with other specialists in the same field. The existence of belonging to the group's value chain ensures the supply of raw material even during harder times.

More about the Lemeks Group on the website www.lemeks.ee

Our value-added chain starts from Estonian forests, for accelerating the growth of which we organise forest planting events each spring.

We manage forests prudently, ensuring thereby the sustainability of Estonian forests. For us it is important to know that we can be confident in the heritage of the timber.

Primary processing of timber is performed in sawmills partially owned by the Lemeks Group. We like it that as a natural material timber has many application areas. The possibility to reuse it adds even more value to it.

Timber value-added chain

Glued laminated timber manufactured by us gives building structures and elements the best load-bearing capacity and durability.

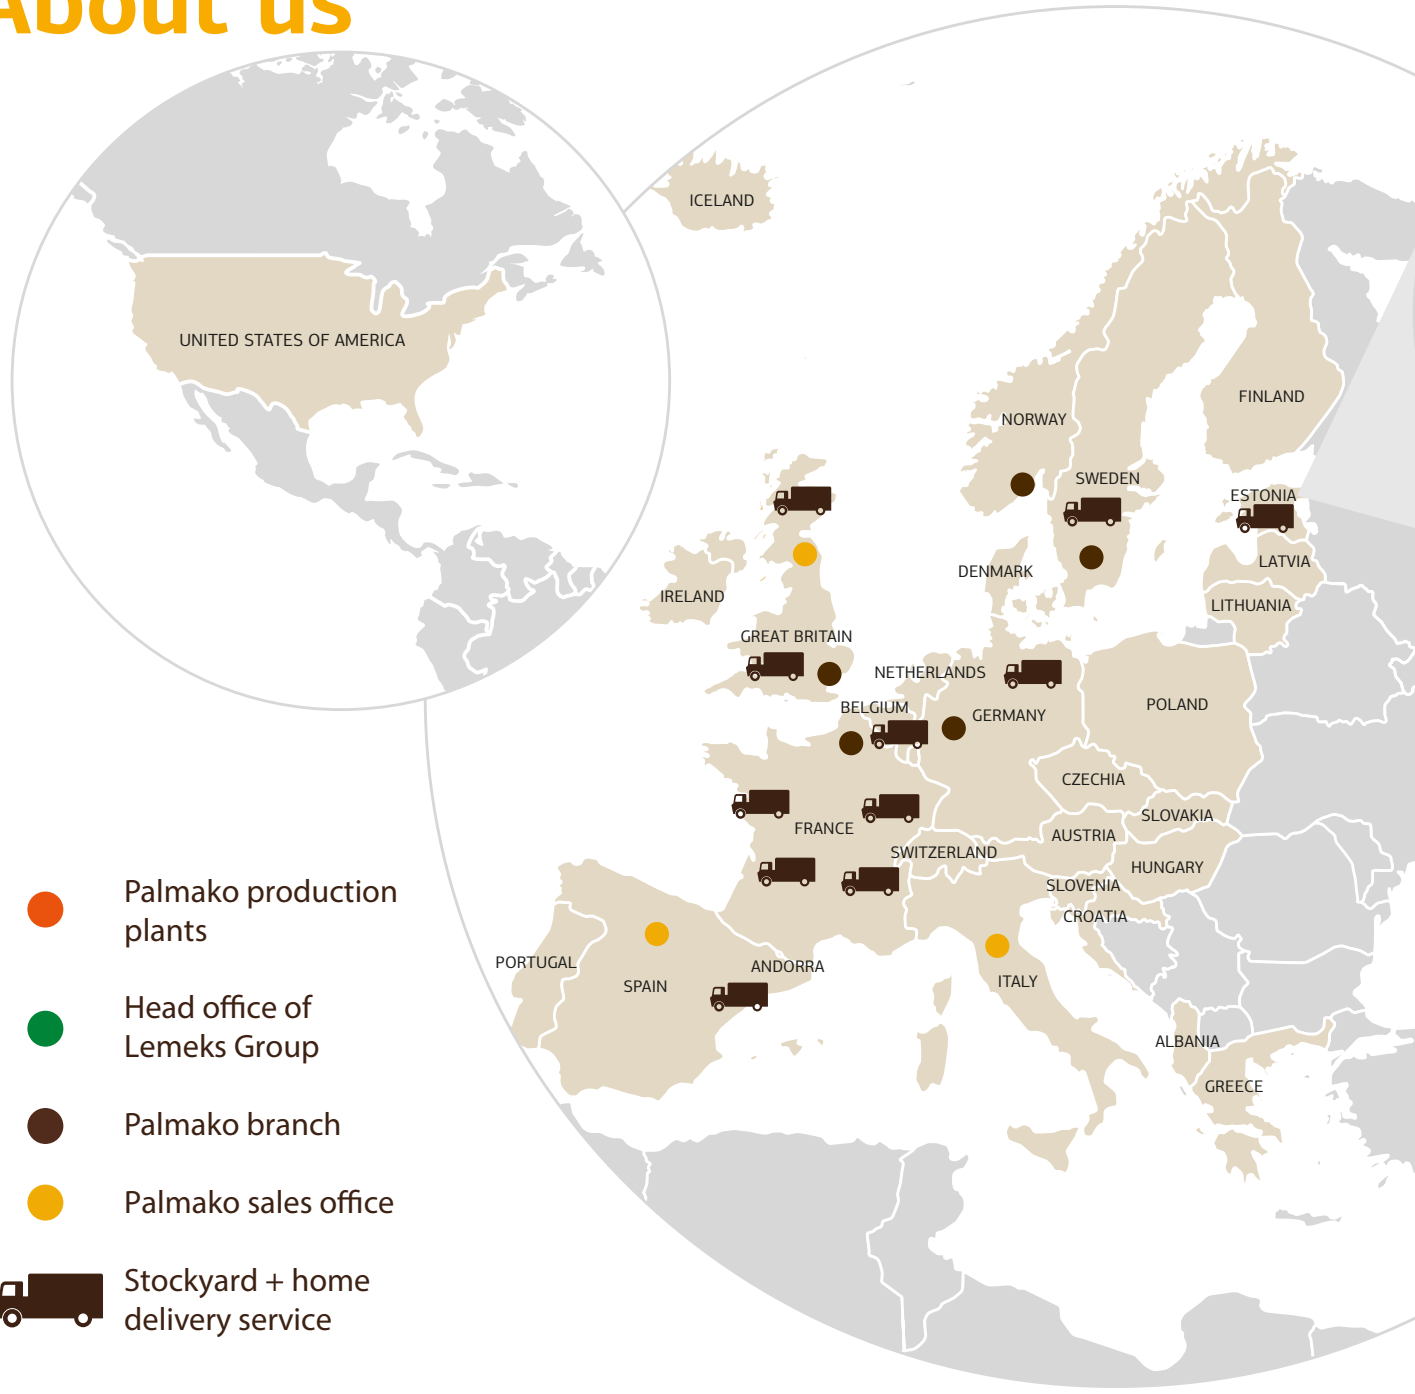

Companies belonging to the Lemeks Group give timber new life. We use it to manufacture playgrounds, summerhouses, industrial buildings and many other items with the aim of making the surrounding environment natural and closer to the nature.

We do our everyday work efficiently and we use timber processing waste in new and sustainable value-added forms.

About us

- Palmako production plants
- Head office of Lemeks Group
- Palmako branch
- Palmako sales office
- Stockyard + home delivery service

Principles that we follow in our everyday work:

- We are honest
- We are goal-oriented
- We are open to changes
- We are willing to take responsibility
- We respect our partners
- We assess our colleagues by their results, not by their words
- We share our knowledge and skills with each other
- We aim to do, rather than impress

We have invested over 45 million euros in modern,

professional technology, which has enabled us to use the best machinery to make our products.

Leading manufacturer in Europe

Palmako produces and exports over 55,000 wooden houses per year, and 23 years of active operation have given us significant experience to become Northern Europe's leading manufacturer and distributor of square log garden houses.

Scan this QR-code to see a video how our products are made with utmost care!

Social responsibility

Although wood is a sustainable and regenerative natural resource, forestry requires careful and responsible management. An uncaring and irresponsible attitude towards forestry management will inevitably harm our environment significantly. We all have heard stories about the loss of some rainforests, but this concern applies equally to our Nordic forests as well. Palmako is FSC® certified, ensuring that we use wood from responsibly managed forests. We care about the environment, which we share and in which we all live. We really do.

5-year warranty

Over the last 23 years we have produced over half a million wooden houses. We use only the latest technology to make no compromises on quality, and to make sure that the nature and its resources are handled in the best possible way. We really care about the environment that we all share. We hope that already offers a reason to trust us, but we also place a 5-year warranty on our buildings and 2-year warranty on our playgrounds and swings for your complete peace of mind.

Excellent customer service

We keep stock of our re-sellers to ensure fast, precise deliveries throughout Europe, and we are ready to deliver our products directly to the end customer's backyard if required. As a multilingual company, we can service our customers in 8 different languages – English, German, French, Spanish, Finnish, Swedish and Norwegian as well as Estonian.

Nordic spruce

Wood is an impressive, warm and living material. And nothing compares to the wonderful aroma of fresh timber. During the long, cold winters the trees grow slowly, which makes their timber especially thick and durable. You can feel it in all our products - comfortable garden and log houses, pavilions, carports, tool sheds, children's play houses, weekend and living houses, glue-laminated products, and wood pellets.

In addition to log cabins, Palmako manufactures wide selection of garden products, glulam products and heating pellets.

Estonia is regarded as the biggest wooden house exporter in the Europe. Palmako plays a significant part in this. Our products are found in more than 30 countries around the world.

Look for FSC certified products.

Structure of products' pages

FUNCTION

All our products are organised into separate classes according to their function and each class begins with an overview of all the items that it includes.

Cabins:
outbuilding and leisure

Pavilions:
Outdoor leisure

Fences:
Fence panels

TYOLOGY

Products of the same type and purpose carry the same name.

In each class products have been assembled into smaller families according to their design.

Families are made up of products that carry similar external characteristics, like type of roof, door and window type and placement, terrace and overhang of the front roof.

Gable roof

Flat roof

Pent roof

Helena cabin family

Irene cabin family

Lotta cabin family

SIZE

Under each family the products are presented in the order of ascending surface area with increasing wall thickness and in some cases improvement of the quality of doors and windows.

AFTER

Palmako garden houses with metal roof

We can officially now present a breakthrough among classical log square garden houses. Until now, depending on the roof type, we offered for our garden buildings either roofing felt, SBS roofing material, EPDM or shingles as an optional extra. Now we have added to our product selection of garden houses those with a metal roof and rain gutters. If you are considered having a metal roof garden house, we have a kit for a garden house with a black (RAL 9004) metal roof, including roof ridge caps, anti-condensation felt and a rainwater system. The metal cover goes straight onto the purlins, i.e. there are no ceiling boards.

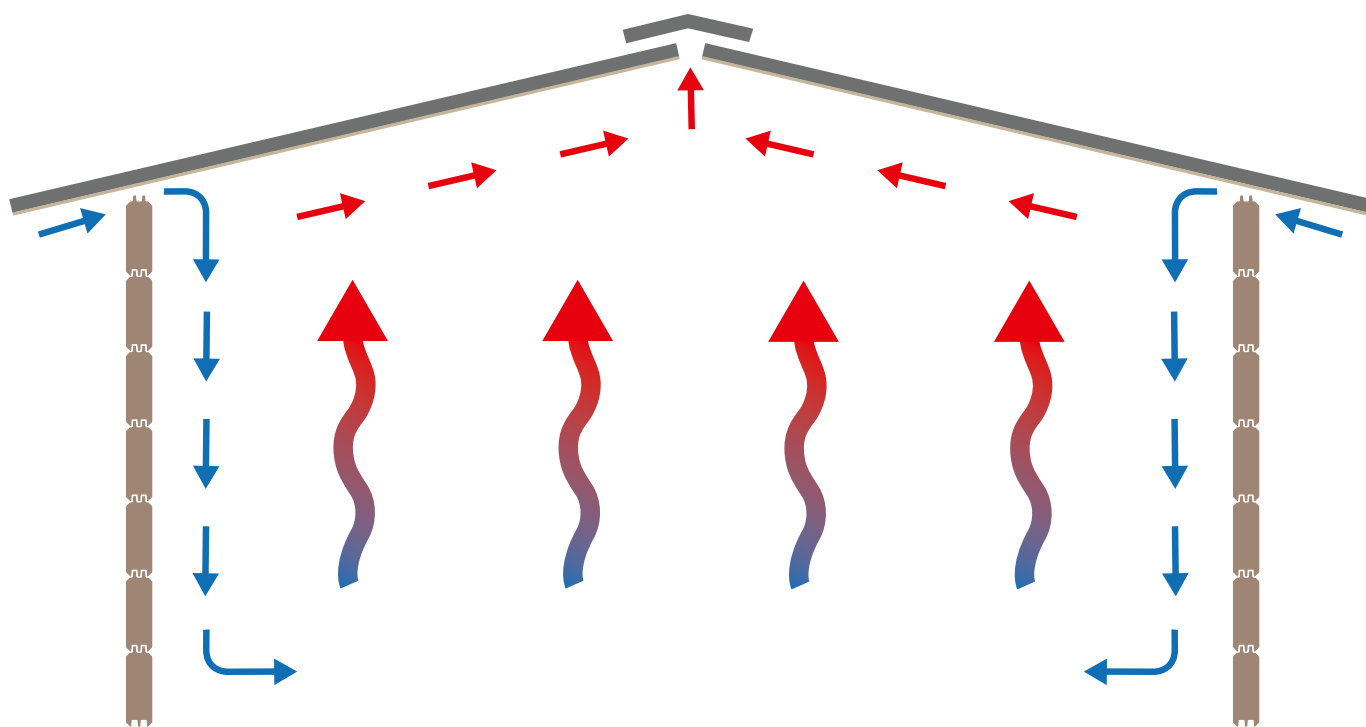

- Metal roof included (10-year warranty)
- Metal thickness 0,45 mm
- Measures of one roofing sheet:
1820x1180 mm (Tiago 7,9 m²);
1850x1180 mm (Tina 7,5 m²);
2200x1180 mm (Tina 10,4 m²,
Tina 13,5 m², Tomas 19,2 m²);
2370x1180 mm (Tiago 11,0 m²)
- DRIPSTOP anti-condensation felt
- Metal rain gutters included
- Carefree roof maintenance

When placed under metal, DRIPSTOP anti-condensation felt traps moisture in the specially designed pockets formed in the membrane. DRIPSTOP holds that moisture until conditions return to below the dew point and then releases it back into the air in the form of normal humidity.

At night, the temperature inside a building is warmer than outside. Warm, wet air rises to the cold roof and cools. As it cools, it can't hold as much moisture. Excess moisture ends up as drops of condensation on the roof. At sunrise the temperature of the metal will rise and the trapped moisture will start to evaporate back into the air as normal humidity.

DRIPSTOP anti-condensation felt is placed under metal and provides a medium for trapping this moisture with its specially designed membrane pockets. DRIPSTOP holds that moisture until conditions return to below the dew point and releases it back into the air in the form of normal humidity. DRIPSTOP anticondensation felt is self-adhesive and is applied to the metal panel in the roll-forming process. As a result, DRIPSTOP arrives at the building site already in place and set to be installed with the roofing panels immediately. The membrane is resistant to aging and provides an additional layer of protection for your metal roof.

Proper ventilation (arrows show how air is released from the building)

WE PRODUCE COTTAGES OF YOUR DREAMS

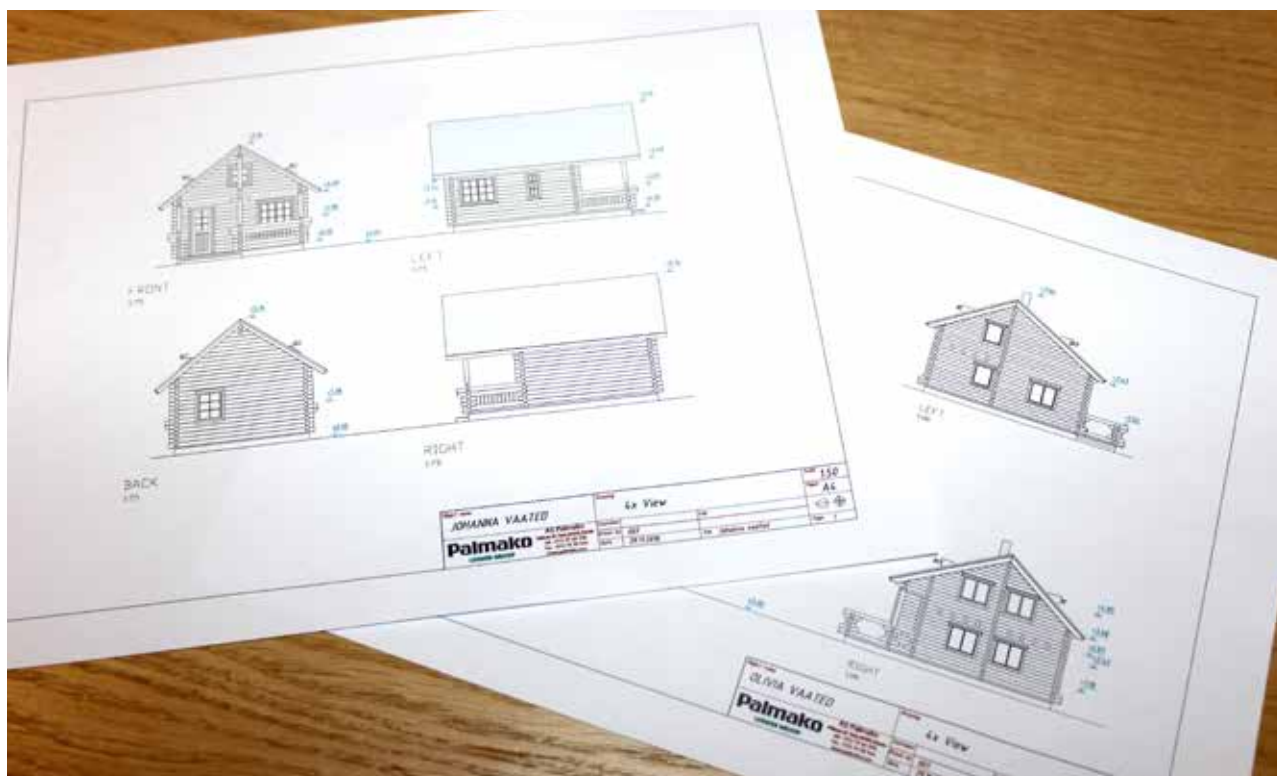

We offer houses with wall thicknesses of 44 mm and 70 mm solid timber, as well as 88 mm, 114 mm and 134 mm laminated timber.

This catalogue includes only some of the models and ideas available for weekend houses – with the help of our architects and bespoke design service we are also able to offer buildings made to your own specific design and requirements.

The 4-side views and ground plans will be supplied when necessary for acquiring a building permit. We can offer you the complete set of wooden details needed for the construction of the house like doors-windows, stairs, cladding for the walls etc. With every house we supply detailed specifications and blueprints for installing the house. All parts have been marked to simplify construction. Please ask for further details.

Individual modifications for all these cottage models in this catalogue are possible! We can also offer these houses with high 'domestic' quality doors and windows (starting from 70 mm log thickness).

We hope you will take contact with us if you have a dream cottage vision in your head. Together we will definitely find the best solution bringing it to reality.

MODERN LOOK

GRACE FAMILY BY PALMAKO

Palmako's new modern look Grace family houses are born from constant unrest to create something new and exciting.

These cabins are extraordinary due to the innovative solution for wall construction – special profile of glue laminated timber wall panels. Glue laminated timber is stable and durable base material, that is also wonderfully easy to set up.

The creation of such products is possible, since Palmako's investment into the new fully automatic production line of laminated timber.

New innovative garden house family has three beautiful sisters: Grace 8.1+4.1 m², Grace 8.1+8.1 m² and Grace 12.4+4.1 m², which differ only in size and purpose. Why not create a cozy home office in a small cabin with a shorter canopy roof or use the Grace with a longer shed as a sauna or pool house. The largest of three sisters, however, is perfect for welcoming guests – two rooms easily accommodate friends or relatives and under the small canopy roof it is possible to enjoy each other's company.

Simple and minimalist design of the Grace family houses is suitable for people who acknowledge timeless quality and uniqueness of environment friendly products that last. For people who understand value of future – be it a father with practical thinking or a housewife who loves aesthetic look. The graceful Grace brings joy into your garden.

Laminated timber combines the modern technology and centuries-old tradition of using wood as a construction material.

Wooden houses present healthy living environment and good qualities of the timber have been hereby increased remarkably.

Palmako brand new Grace family houses use laminated timber wall panels, which are stable and weatherproof and make building wonderfully simple. Glue laminated wood ensures, that the building does not sink after completing. Unlike conventional laminated timber houses, new wall panel profile is unique - it is thin and high and the tenon joints stay tighter by being covered with a slat.

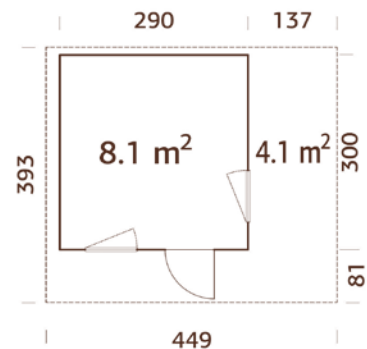

To reach the full height of the house, only 4 panels on top of each other are needed. When the lifting height of an ordinary milling beam is 114 mm, the new wall panel has a lifting height of 518 mm, which means that the surface of the wall remains smoother. Laminated timber is stable (no expansion-contraction or distortion), has a beautiful structure (no fissures or defects) and has a good fire resistance and heat insulation.

Glue laminated wall panels.

Strong purlins from laminated wood.

56 mm

A: 215 cm
B: 258 cm

Included
28 mm

All Grace family garden houses use innovative glue laminated wall panels. Lifting height of 518 mm makes an installation of the house easy and fast.

Modern wall connection of glue laminated wall panels is fixed with dowels and secured by screws.

Stable and weatherproof corner and log connections are guaranteed by using self-adhesive sealing.

Premium quality windows and door

The quality of Grace houses doors and windows is the best in its class. Laminated timber door frames, low door sill covered with stainless steel, double toughened glass and premium lock system. Windows are with one-hand tilt-and-turn system with double toughened glass.

Foundation joists and floor boards

Foundation joists of the Grace houses are treated to guarantee long lifetime to the basis of the house. Solid 28 mm floor boards and floor slats are included in the house kit.

Roof construction

Strong glue laminated rafters carry 19 mm roof boards. To ensure water resistance of roof, we strongly recommend to use solid EPDM roof covering for these pent roof house models.

WE HAVE A GREAT ALTERNATIVE TO THE TRADITIONAL GARDEN HOUSE!

These contemporary-style buildings with a Scandinavian look and quality are most suitable for a city garden. Palmako Nordic Houses represent our most modern and innovative pre-fabricated house models.

These models have 40 mm EPS (Expanded polystyrene) insulated doors, which makes them especially rain and wind resistant.

1. Plywood 10mm
2. Plywood 10mm
3. EPS 50 40mm insulation
4. Wooden skeleton 40x40mm
5. Wooden laminated frame 44x105mm
6. Hardwood 28x93mm threshold
7. Hinge 115x84x3mm (3x)
8. 565 lock and lock box

Ready-made wall elements are covered with wind-protection plastic inside, making these houses extremely weatherproof, especially rain and wind resistant. 70 mm frame construction is perfect for hiding cabling (wires, pipes, etc) as well as for the same thickness of insulation. All the houses have double thermo glazing and outwards-opening windows.

Total element thickness by Nordic houses is 88 mm. Here is a cross section of an element just to get better understanding of what these elements look like and consist of:

1. 34x70mm frame
2. Wind-protection plastic
3. 18mm fine sawn cladding

PRE-FABRICATED PALMAKO NORDIC+ HOUSES WITH ELEMENT THICKNESS OF 160 MM

These Scandinavian-style houses are suitable for any garden that lacks strong, weather-resistant buildings where you can be with your family and friends. Feel free to take your time and delve into the following pages of our best choice of modern, pre-fabricated Nordic+ houses.

Ready-made wall elements are covered with wind-protection plastic inside, making these houses extremely weatherproof, especially rain and wind-resistant. It is comfortable to be in a building when it is warm - we have thought about it and given you an opportunity for 95 mm insulation. You can insulate walls, floors and ceilings. For better house ventilation we have added ventilation battens after cladding. All the houses have double thermo glazing and outwards-opening windows. These models have 40 mm EPS (expanded polystyrene) insulated doors.

Total element thickness by Nordic+ houses is 160 mm. Here is a cross section of an element just to get a better understanding of what these elements look like and consist of:

1. 44x95mm frame
2. Wind-protection plastic
3. 19x45mm ventilation battens
4. 28x70mm cladding support battens
5. 18mm fine sawn cladding

One set – many houses!

A model contains set of wall and window-door elements, which can be rearranged in several ways. This results in multiple appearance options for the house. If you like more light in the house you can choose between three window options of different size (small, half and large). Please have a look at them on p. 266. Ready-made elements and simple construction allow for fast and easy assembly.

COMBINING PERGOLAS WITH FENCE PANELS AND FURNITURE

We recommend combining Paula 9.5 m² and Paula 12.6 m² pergolas with our fence panels and garden furniture. These pergolas are developed so that you can easily add all 900-mm-width fence panels between the posts of pergola.

With Paula 9.5 m² you can add three fence panels in both sides and back. With Paula 12.6 m² it is possible to add three fence panels in both sides and four panels in back. And do not forget to order posts between the fence panels.

Paula 9,5 m² combined with Birgit 2, Janet 2, Elke 2 and Elke 3 fence panels.

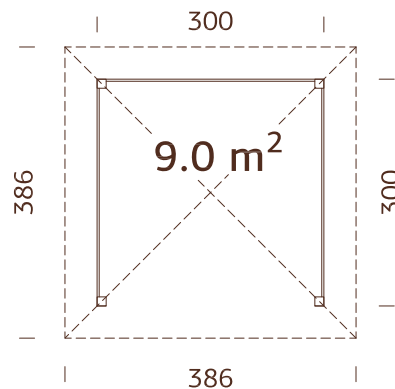

Paula 12,6 m² combined with Doris 2 and Doris 3 fence panels.

If you would like to fill the space under the pergola with furniture to spend time with your friends and family, please see our wooden garden furniture selection on p. 232-239.

PRE-FABRICATED PALMAKO NORDIC GARAGES WITH ELEMENT THICKNESS OF 88 MM

These contemporary-style buildings with a Scandinavian look and quality are most suitable for a city garden. Palmako Garages represent our most modern and innovative pre-fabricated garage models.

These models have 40 mm EPS (Expanded polystyrene) insulated doors, which makes them especially rain and wind resistant.

1. Plywood 10mm
2. Plywood 10mm
3. EPS 50 40mm insulation
4. Wooden skeleton 40x40mm
5. Wooden laminated frame 44x105mm
6. Hardwood 28x93mm threshold
7. Hinge 115x84x3mm (3x)
8. 565 lock and lock box

Ready-made wall elements are covered with wind-protection plastic inside, making these houses extremely weatherproof, especially rain and wind resistant. In order to hide cabling (wires, pipes, etc.) there is internal wall-cladding and there is also opportunity for 70 mm insulation. All the houses have double thermo glazing and outwards-opening windows.

Total element thickness by Nordic garages is 88 mm. Here is a cross section of an element just to get better understanding of what these elements look like and consist of:

1. 34x70mm frame
2. Wind-protection plastic
3. 18mm fine sawn cladding

PALMAKO NORDIC GARAGE STEN 22,9 m²

ARTICLE NUMBER: 109010

ONE SET – MANY HOUSES!

A model contains a set of wall and window-door elements, which can be rearranged in several ways. This results in multiple appearance options for the garage.

PRE-FABRICATED PALMAKO NORDIC+ GARAGES WITH ELEMENT THICKNESS OF 160 MM

These Scandinavian-style garages are suitable for any garden that lacks strong, weather-resistant buildings where you can be with your family and friends. Feel free to take your time and delve into the following pages of our best choice of modern, pre-fabricated Nordic+ houses.

Ready-made wall elements are covered with wind-protection plastic inside, making these garages extremely weatherproof, especially rain and wind-resistant. It is comfortable to be in a building when it is warm - we have thought about it and given you an opportunity for 95 mm insulation. You can insulate walls, floors and ceilings. For better ventilation we have added ventilation battens after cladding. All the garages have double thermo glazing and outwards-opening windows. These models have 40 mm EPS (expanded polystyrene) insulated doors.

Total element thickness by Nordic+ garages is 160 mm. Here is a cross section of an element just to get a better understanding of what these elements look like and consist of:

1. 44x95mm frame
2. Wind-protection plastic
3. 19x45mm ventilation battens
4. 28x70mm cladding support battens
5. 18mm fine sawn cladding

One set – many houses!

A model contains set of wall and window-door elements, which can be rearranged in several ways. This results in multiple appearance options for the house. If you like more light in the garage you can choose between three window options of different size (small, half and large). Please have a look at them on p. 266. Ready-made elements and simple construction allow for fast and easy assembly.

THE DOOR QUALITY OF MARTIN, OLAF AND KALLE SHEDS

Contemporary-style buildings including Martin, Olaf and Kalle sheds have ready-made wall elements that are covered inside with wind and moisture protection plastic, making these houses extremely weatherproof. A model contains a set of wall and window-door elements which can be rearranged in several ways. Simple construction allows for fast and easy assembly.

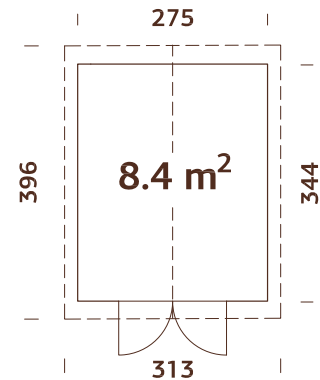

These models also have 32 mm EPS (expanded polystyrene) insulated doors, which make them especially rain and wind resistant. Please study the drawing.

1. HDF 3mm
2. EPS 50 32mm insulation
3. Wooden cladding 12x114mm
4. Wooden skeleton 32x40mm
5. Wooden laminated frame 44x90mm
6. Hardwood 28x78mm threshold
7. Metal kick plate 0,5mm covered with black pural matt coating
8. Hinge 115x84x3mm (3x)
9. 2018 lock and lock box

CREATE YOUR OWN GARDEN STORY WITH PALMAKO FENCE LIGHT PANELS AND FENCE PREMIUM PANELS

If your garden misses elegant and airy fence panels, be ready to meet our Fence Light and Premium selection. These modern panels give your city garden or terrace a fresh and new look.

Please get familiar with designs as follows:

Fence Light panels, 33x57 mm frame

Reena

Vertical with rail in the middle. Horizontal trellis.

Elke

Vertical with rail in the middle. Vertical trellis.

Helis

Horizontal with caps and two vertical rails. Vertical trellis with one cross.

Marit

Horizontal with caps and two vertical rails. Vertical trellis with three crosses.

Karina

Vertical with rail in the middle. Vertical trellis with three crosses.

Fence Premium Panels, 44x90 mm frame

Doris

Horizontal with caps.

Elly

Vertical with an upper trellis.

Freia

Diagonal trellis.

Depending on frame profile, you can choose between seven dimensions:

Fence Light panels with 33x57 mm profile

1800x1800 mm	1800x1500 mm
900x1800 mm	900x1500 mm
900x1800/900 mm	900x1500/900 mm
1800x900 mm	

Fence Premium panels with 44x90 mm profile

1800x1800 mm
900x1800 mm
900x1800/900 mm
1800x900 mm
1800x1500 mm

We can give our fence panels in two, some of them in four treatments so you can decide which treatment suits best with your garden:

grey pressure-treated

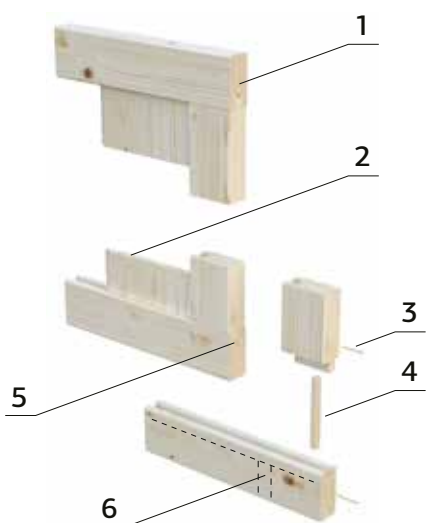

green pressure-treated

primer+white painted 2 layers (RAL 9016)

primer+grey painted 2 layers (RAL7016)

1. Frame profile 33x57mm / 44x90mm
2. Board profile 12x95mm / 16x111mm
3. Brad nails
4. Dowel 10x160mm / 16x130mm
5. Water channel
6. Drainage hole to let out any built up moisture or water

All our fence panels can be easily assembled. If you look at the visual of assembling a fence panel below, you will see which products you need and how to assemble them together.

See Optional Products on p. 229 for details.

1. Fence panel
2. Post
3. Post leg
4. Screws
5. L-type fastening brackets
6. Post cap

Fixings to the ground should be done properly according to the foundation. Please get appropriate fixing items from the DIY-store.

Scan this QR-code to see the assembly of Palmako Fence Light Panels!

All fence panels are made of Nordic spruce which is dense, strong, durable and has small knots.

PALMAKO PAVILION

SETS – WHEN YOU NEED A FUNCTIONAL GARDEN

Fence panels can be added in-between different modules to create a functional and unique garden. You can complement the set with additional products.

Here are some examples for your inspiration:

CREATE A 3D GARDEN WITH PALMAKO MODULAR GARDEN™ MODULES AND ACCESSORIES

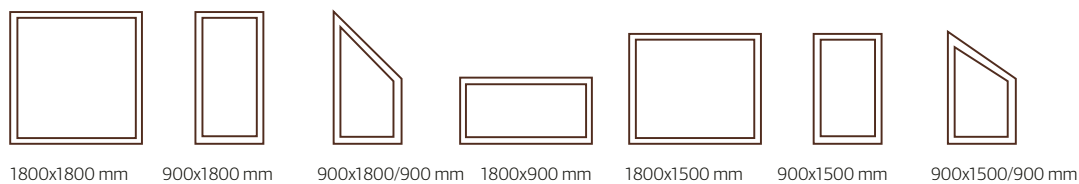

Palmako Modular Garden™ is Palmako's modular fence element series from the panels of which it is possible to build a fence that can be completed by adding large modules with different purposes. Modules are available in different functions and sizes. In such way, it is possible to turn a 2D fence into a 3D room structure, enabling everyone to create a functional, unique and comfortable garden space that meets their requirements. It is possible to create a complete set, as well as order a fence or a module individually. The modular garden can be constantly improved by obtaining more products to accompany the already purchased, installed solutions.

If you plan to erect a fence, it is important to use suitable fence panels and posts.

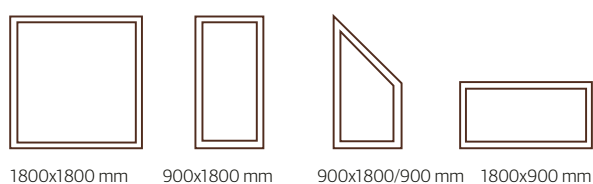

10 different designs

The 7 different dimensions of the Fence Light series, frame profile 33x57 mm

The 4 different dimensions of the Fence Premium series, frame profile 44x90 mm

Finishing

White painted
2 layers (RAL 9016)

WTPNT1+2

Modules

Active people have various interests and needs. If your household lacks space and there is no suitable room for some activities or sometimes just wish to hide from the rain when outside, it is a good idea to take a look at the Palmako Modular Garden™ functional modules. The choice is wide and there are modules for different purposes.

Additional products

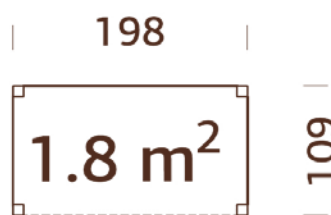

To customise the set, you can complement the module with practical additional products.

By special request from Palmako, the Modular Garden was developed by professional product designers and architects. The aim of the design is to offer simplicity and modularity, functional value that is elegantly enhanced by a modern shape and the possibility to match one's own garden and taste. The Palmako Modular Garden™ products can be assembled according to personal needs and taste, and the installation of product combinations in the garden is simple and quick – it does not require sawing, gluing or pasting.

Palmako Modular Garden™ is Registered Community design No. 003752187-001 – 003752187-020.

PALMAKO SHELTER

ARTICLE NUMBER: 103446

ENGINE SET FOR GARAGE SECTIONAL DOOR

ARTICLE NUMBER: 108561

MODEL SPECIFICATIONS

Motor measures: 600x250x350 mm

Rail measures: 3000x50x100 mm

Weight: 10+5 kg

Engine set for garage sectional door includes electrical engine, metal installation construction (rails) and 2 remotes. Depending on the model of the garage, additional accessories may be required for installation. Electrical connection required!

ROOFING MATERIAL

To keep your house well protected from the weather, we offer you different types of roof covering materials - roofing felt (suitable as an underlayer), SBS roofing material, shingles or EPDM. The second one, SBS roofing material can be attached in a single layer, but it would be temporary solution and will not last as long as attached in multiple layers. It can be welded on the preplaced bottom layer of roof cladding with a gas burner. Attention! For wooden houses please follow the safety requirements, and if possible please let it be welded by professional roofers. The last, EPDM, is perfect for flat-roof models. We offer shingles in four different colours as follows - black, red, green or brown. You can buy roof covering material in full rolls/packs/ready-cut pieces.

Black shingles

Black EPDM (includes adhesive for installation)

Black roofing felt (underlayer)

ROOF COVERING MATERIAL FOR FLAT ROOF HOUSES

Palmako offers quite a wide range of flat roof cabins.

A question that we have always been asked is what to use as waterproof roof covering material for flat roofs? As you notice in the section of "Optional" under each flat roof house there is mention of special rubber roof covering material – EPDM (ethylene propylene diene monomer).

Here are some of the benefits why we truly recommend you to invest in EPDM roof covering material:

- reduces potential condensations problems that can erode performance
- long average service life (can last up to 20 years)
- EPDM is the most dimensionally stable heat resistance membrane and stays flexible even in extremely cold conditions.

EPDM users in colder climate can also benefit from:

- reduced heating costs
- reduced carbon footprint by lowering heating costs
- reduced safety hazard from snow and ice accumulation

We offer EPDM in ready-cut-pieces, the article number of suitable EPDM is given in the table of optional products after every product group and in Optional Products part at the end of the catalogue.

Our EPDM set includes wet-adhesive for installation.

The installation of EPDM is easy, just follow the installation manual enclosed with the product.

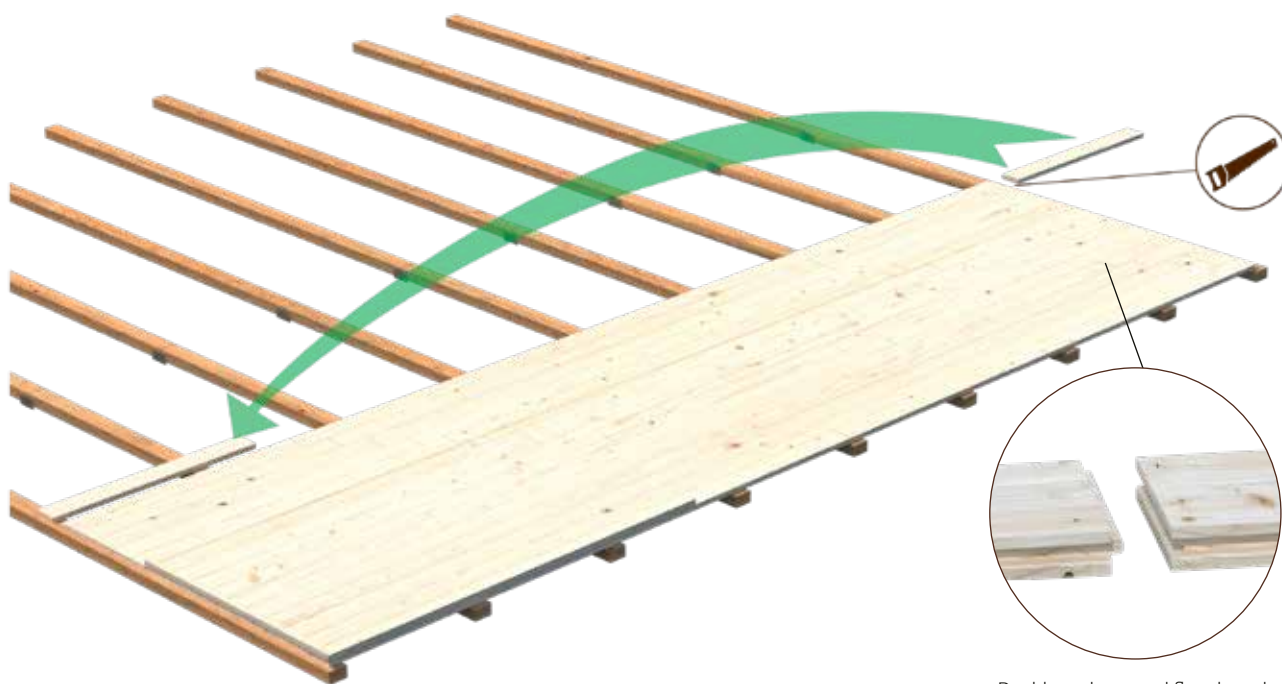

FLOORS

To meet the specific market demands some of our cabins are sold without a floor. Although in majority cases floor can be purchased as an optional extra. As of 2021 Palmako starts to offer unified floor kits in such a cases.

An unified floor kit contains of:

- 19x89x2350 mm double and tenoned needed number of floorboards
- 45x70x3000 mm brown dipped (BNDIP) needed number of foundation beams
- 19x19x2350 mm skirting boards
- 19x19 mm door strip according to the width of the door opening (in two sizes - for a single door and a double door) and the wall thickness.

Due to the different size of cabins and measurements of the floors, please consider below described principle in general in cutting floorboards into the exact measure.

Double end tenoned floor board

Brown dipped foundation beams, 45x70 mm

House	Art. No.	Floor boards

ADDITIONAL DOORS AND WINDOWS

Majority of our cabins and buildings are designed in a way, that one can easily amend it with additional door(s) and window(s) in addition to the existing ones. So far Palmako offered limited range of additional doors and windows. As of 2021 we offer full range of doors and windows suitable to our buildings. For example our cozy and classical cabin Sally 15,5 m² has just one double window in original set. If one wishes a more lightful cabin, it can be easily amended by exactly same type of additional window (Art. No. 103502). As one building can consist of different size and model of doors and windows, please consult with our sales team before placing an order.

Treatment as additional protection for wooden products

Production lines and machines allow us to flexibly arrange procedures and to produce a very wide product range from square log houses with different log thicknesses to the element, prefabricated and large weekend log houses. In addition to other wooden products in your garden - fence panels, terrace fences, garden furniture, machine rounded posts, flowerboxes, log rolls and many other products.

Unprocessed wood becomes greyish after having been left untouched for a while and can turn blue and become moldy. Treating wood with a preservative effectively protects against wood-destroying fungi and insects, including termites. Therefore we recommend using our product treatment service.

Dipping bath for treatment

Depending on the product type we are able to treat the products in different ways. As we have our own treatment baths for brown, grey and clear white dip treatment, cabins and other larger sized items can be ordered treated with Axil 3000 P by the Sarpap & Cecil Industries water-soluble treatment liquid, guaranteeing treatment within classes 1-3. The brown and grey dipping treatment can enhance the colour of your house, but the clear white dipping works for the pre-paint preparation stage.

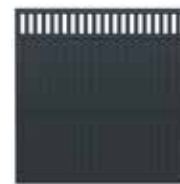

TREATED AND PAINTED FENCE PANELS

GYVPI grey
pressure-treated

WTPNT1+2 primer +
white painted 2 layers
(RAL 9016)

GYPNT1+2 primer +
grey painted 2 layers
(RAL 7016)

Smaller sized items like furniture can be pressure-treated in the vacuum-pressure-vacuum method giving these items a green or brown shade. All fence panels can be grey pressure-treated or white or grey painted (primer plus two layers of paint). In order to extend the service life of timber we treat our products with Impralit®-KDS wood preservative. This is a water-borne, chromium-free wood preservative for the prevention of insect attacks, soft rot and fungal decay. It also offers temporary protection against blue stain and mould. Impralit®-KDS is only to be used for treating wood according to the requirements of use classes 1, 2, 3 and 4 as stipulated in EN 335-1. For wood under cover and in the open, above ground and in ground contact, e.g. poles, fencing, playgrounds, pergolas, etc. The preservative penetrates deep into the wood with the help of vacuum and pressure. In this case a vacuum is initially generated in the cell cavities thereby evacuating the air inside them. The cavities are then filled with a preservative

solution that is forced into the wood under high pressure. For vacuum pressure impregnation we work with different processes depending on the type of wood, environment and end purpose.

We have invested into modern painting technology that enables us to paint smaller sized garden products like fence panels, posts and furniture. Today we are able to paint the products white, using flowcoat spray chamber method. After painting, the products will dry in a 30 meter long drying chamber, where the whole process of drying can be adjusted and observed.

Using the same technique, we are now also able to coat several houses with one layer of white primer (WTPNT1+0), which simplifies the further finishing of the product.

You will find available treatment options next to each product under Treatment Options section.

Please get familiar with the article number and description of the treatment we offer as follows:

Painted products in drying chamber

Art. No.	Description	Treatment
NO	Natural, untreated wood	
BNDIP	Brown dip	
GYDIP	Grey dip	
WTDIP	Clear white dip	
GNVPI	Green pressure-treated	
GYVPI	Grey pressure-treated	
BNVPI	Brown pressure-treated	
GNVPIH4	Green pressure-treated HC4	
GNVPIA	Green pressure-treated NTR-A	
WTPNT1+0	White primer	
WTPNT1+2	Primer + white painted 2 layers (RAL 9016)	
GYPNT1+2	Primer + grey painted 2 layers (RAL 7016)

Bringing joy to the garden

Palmako AS is the leading manufacturer of garden and log houses, glue-laminated products and wood pellets. Our product range is wide: square log garden houses, garden cabins, garden sheds, pavilions, carports, tool sheds, children's playhouses, and weekend and living houses. We also offer a wide choice of timber products in your garden – fence panels, posts and poles, wooden furniture, log rolls and terrace boards.

Catalogue models are kept in stock year-round for quick delivery throughout the world. Our products are well known for their quality because we use the best raw material available: durable and beautiful Nordic spruce. Palmako is FSC certified and products made from FSC timber have been marked accordingly.

Over 23 years of experience in wood industry has made us one of the leading companies in this area in Europe today.
